

**DW-GUN-01 Anti drone gun**

- The DW-GUN-01 is specially designed for black flying drones to protection for low-altitude safety.
- It will transmit the high power jamming signal to force the entering drone out of ground control, to return home or force land. With this anti drone gun signal jammer, the drone can not send the reconnaissance photo and video to the ground anymore; also, the ground will lose control of the drone.
- The product quality is reliable ,and widely used in the Chinese Ministry of Public Security security system

**Description**

- The product quality is reliable,through the Chinese Ministry of Public Security test
- Long range >1.0KM
- High gain built in directional antenna
- Easy to operate, “expel” or “land” two modes
- Split structure design, carefree transportation
- Battery level,shows the current battery level

**Specifications**

Item name	Technical parameters
Name	Anti drone gun
Model	DW-GUN-01
Channels	3 Channels
Working frequency	Remote control or picture transmission: 2400-2500MHZ/10W 5725-5850MHZ/10W GPS: 1550-1620MHZ /10W
Antenna	Directional antenna
Total Output Power	30W
Jamming distance	>1.0 KM
Control mode	Landing or Expelling
Power supply	Internal Battery 3.5AH 90mins
Size LWH (main parts)	55*30*14CM
Weight(main parts)	2KG,
Operating temperature	-20℃~70℃

## Multi Application

- Military base station protection
- Military team protection
- Prison protection from drug dealing etc
- Border patrol controlling
- Police system defense system
- VIP convoy
- Etc.
